PROFESSIONAL SUMMARY

Senior Frontend Engineer with 8+ years of experience building high-performance, scalable React and Next.js applications. Specialized in optimizing UI workflows, driving technical decisions, and improving performance through modern optimization techniques. Collaborates closely with Product, Design, and Backend teams to ship impactful features in fast-paced startup environments.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind, Mobile-first UIs

State management and API: Redux, Context API, SWR, React-query, REST APIs, GraphQL

Tools: Git, CI/CD, React Testing Library, Cypress, GA, SEO, Cursor AI

Performance: LCP, CLS, INP, TTFB improvements, Lighthouse, Web vitals

Visualization: D3, chart.js, Nivo charts, Recharts, Canvas Js

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Droppe, Finland (Remote) | June 2021 - Present

- Led development of key UI components and optimized e-commerce user flows for a wholesale marketplace (**React, TypeScript, Next.js, SWR**) used by **4K+** daily users
- **Mentored** 3 junior developers, established frontend architecture standards and code review principles, and led technical interviews
- Designed and optimized interactive workflows to simplify complex B2B buying and selling processes, increasing checkout conversions from **0.9% to 1.5%**
- Build and maintain scalable component library ensuring consistency as the team scales
- Ship **15+ features** monthly with full ownership, making fast decisions to optimize for user impact
- Architected responsive, cross-browser compatible interfaces and performance optimizations using Google Lighthouse and Web Vitals, improving Google Lighthouse score by **40%**

Senior Software Engineer | Homage, Singapore (Remote - Contract) | Nov 2020 - June 2021

- Led frontend domain with effective planning while **mentoring** 2 developers.
- Built core UI views for a patient management system using **React, TypeScript, and Redux** under tight deadlines

- Designed **10+** responsive, accessible interfaces from complex designs with attention to detail
- Implemented timezone-aware appointment bookings and payment integration with **Stripe**

Senior Software Engineer | Strategic Systems International, Lahore | May 2020 - Feb 2021

- Owned frontend development for stock information platform (pro.benzinga.com) using **React, TypeScript and Next.js**
- Built complex data visualization charts using recharts, making financial workflows simple and intuitive
- Collaborated with Backend Engineering on API design and data structure optimization
- Implemented real-time updates by integrating **WebSockets** and **React Query**

React.js Developer | Big Byte Insights, Lahore | March 2019 - April 2020

- Built comprehensive dashboard UI components using **React** with advanced data visualization
- Designed intuitive interfaces for complex analytics workflows using **Canvas.js, Nivo, and Recharts**
- Developed reusable components that improved dashboard scalability and enabled integration of diverse chart types
- Improved performance metrics by **50%** by optimizing large dataset handling and real-time chart rendering

JavaScript Developer | Devcrew.io, Lahore | Feb 2018 - March 2019

- Built responsive **React** applications with seamless backend API integration
- Converted complex **Flash** applications to modern **HTML5 Canvas** with performance optimization

IMPACT HIGHLIGHTS

- Increased e-commerce conversion rates by **50%** through data-driven workflow optimization using **Hotjar** and behavioral analytics
- Improved Core Web Vitals by **40%** (LCP, CLS, INP) through lazy loading, priority image fetching, and Next.js performance patterns
- Mentored 3 junior developers on React best practices, code review, and architecture decisions
- Ship **15+ production** features monthly with full end-to-end ownership in a fast-paced startup environment

EDUCATION

Bachelor of Computer Sciences | Government College University Lahore | 2013-2017
